Rubric for Final Project Report			
	Underdeveloped (1-2)	Solid/Fair (3-5)	Excellent (6)
Goal/ Problem identification	Proposal does not have a clear goal or no clear connection between proposed solution and a real world problem	The severity of the problem is not clearly discussed or solution not fully addresses the problem or not sufficiently justified.	Problem is clearly stated and proposed solution properly addresses the solution.
Implementation	Final product does not fully function properly or functionality is incomplete.	Final product functions, but does not fully solve the proposed problem or still has glitches.	Final product clearly solves the proposed problem. With some extra work, could function as a marketable product.
Documentation	Little explanation on how the product is used or how it was developed	Explanation on how to use the product is given, but information might not be easy to find or expressed with a good logical flow.	Documentation is accessible and easy to read. Information is presented in clear logic flow.
Discussion	Report lacks insights gained or challenges faced in the project.	Report contains some insights gained or challenges faced, but no clear path to improving the final product.	Report discusses challenges and provides possible enhancements and insights gained during the project with a clear path and justification.
Quality	Figures and tables not labeled or referenced in text. Spelling and grammar mistakes adversely affect legibility of text. Figures/tables improperly placed.	Figures and tables not labeled or referenced in text. Some spelling and grammar mistakes, but does not affect legibility of text. Some figures/tables cross the border or not evenly spaced from text.	Figures and tables are properly labeled and referenced in text. No/few spelling and grammar mistakes. Proper spacing and bordering.
